OTHER INTERESTING EQUIPMENT

5

An early edition of this book illustrated some equipment specific to the State University of New York at Buffalo, since that's where I wrote it. It's now a few years later, and I realize that you can't make a comprehensive list.

Buffalo has an unusual pear-shaped distilling flask that I've not seen elsewhere. The University of Connecticut equipment list contains a Bobbitt Filter Clip that few other schools have picked up.

So if you are disappointed that I don't have a list and drawing of every single piece of equipment in your drawer, I apologize. Only the most common organic lab equipment is covered here. Ask your instructor "Whattizzit?" if you do not know.

I assume that you remember Erlenmeyer flasks, and beakers and such from the freshman lab. I'll discuss the other apparatus as it comes up in the various techniques. This might force you to read this book before you start lab.

Check out Fig. 30. Not all the mysterious doodads in your laboratory drawer are shown, but the more important ones are.

Drying tubes
